Login	- When we enter invalid Login ID and valid password an error popup says "Employee not found".	checked	Set Invalid Email And Password	
	- After clicking on "Forgot password", the mailID is removed.			
	- After entering 15 blank spaces in password field, an error popup says "Employee not found".	checked	Set Invalid Password.	
	- After clicking on Apple and google icon nothing happens.			
	- Login popup is missing "Don't have an account? Please Sign-in".		tester explanation needed	
	- In password, enter correct password (@Fooglesrich41), now remove 41 and try to login so error popup is displayed saying "Employee not found", now type 41 after @Fooglesrich, this time error popup is displayed saying "Employee not found".	checked	Set Invalid Password.	
	- In password field enter email ID now cut and paste it in emailID field, the mailID in password field is not removed after cut process.			
Dashboard	- After clicking on back button the left menu list is cut off.	dev		
	- After clicking on Profile, Integration, setting, Guide, Help centre nothing happens.	dev	currently setting redirects to general setting and profile redirect to Employee profile "Swapnil"	
	- After clicking on PMRS from "PMRS > Dashboard", logout happens.		Redirect to dashboard when click on PMRS	
	- Header > After mouseovering on Logout icon and bell icon option the text "Logout" and "Notifications" is not displayed.	dev	Set the Hover on the both icons	
	- Notifications > Settings icon > After clicking Logout happens.			
	- After mouseovering on Notifications list each notification displays the text "Dropdown ends".	dev	Remove the dropdown end	
	- After clicking on Notifications list nothing happens.			
	- Edit Project > Can add latest date in start date and previous date in end date.	dev	Set the validation for Start date and end date like end date is not less than Start date and Start date must be not previous date	
	- Edit Project > Project type > Spelling for "Recurring" is wrong.	dev	Correct the Spelling from recurring to Recurring	
	- Edit Project > Can enter negative project price	dev	Set the validation if project price is negative the show alert for Project Price should be greater than 0.	
Left Menu list	- The icons for Performance and Leave are same.	dev	Set different icons now	
	- Projects > Milestone and task icons are same.	dev	Set different icons now	
	- Projects > Icons for Projects is same.	dev	Set different icons now	
	- Employee > Icon for Employee and role is same.	dev	Set different icons now	
	- Settings > general setting button change	dev	Set different icons now	
	- Settings > The menus "Milestone Status", "Team member" and "Terms & Conditions" are aligned in two lines.	dev	Now aligned	
	- While mouseovering, the mouseovering effect is missing.	dev		
Calendar	- After clicking on Calendar a blank page is displayed.	Own branch	ui need approval	
Projects	- Sort filter is missing for progress.		tester explanation needed	Ignore this BUG for now.
	- Milestone > Can create a milestone whose date doesn't come in between project start date and project end date.	dev		
Task	- Spelling "Panding" is wrong.	Own branch		
	- The "Total task" card count is wrong, it should be 120 = 50 (working) + 50 (completed) + 20 (pending).			
Locker List	- Serial number short form is wrong, it should be "Sr.No."	dev		
	- Can create duplicate locker by renaming same name to another locker.	dev	bug found in locker on edit time its giving error instead of the duplicate entry "Swapnil"	
Performance	- Can enter negative values in Target and Add value.	Own branch		
Employee	- Can't add new employee.	dev		
	- Joining date can be older than birth date.	Own branch	Add validations

Login	- When we enter invalid mail ID of employee (eg. John@gmail.c) and valid password (John@1234) and press Login button then in both email and password input fields right icon appears and then an error popup appears saying "Invalid Email And Password". After clicking OK from above error popup it shows error popup "Invalid password".		FIXED
- Performance >	When we mousehover on add button in Action column then the tooltip shows "Target" text, it should be "Add target".		FIXED
- Performance >	We can open Target and Add value popup back to back.	Working on dev need to check uat files	
- Topbar >	After clicking on Notifications icon the tooltip and dropdown list both are shown.(Tooltip should be only shown after mousehover)	Not Valid	
- Dashboard >	Profile menu dropdown list > When we mousehover on Profile,Integration,Setting... a tooltip "Dropdown end" is shown.		FIXED
-Leftsidebar>	- Navigation link active effect is missing for the functionalities like Projects,Milestone, Role,Department, Settings...		FIXED
- Dashboard >	Edit project > "Total days" input field is not ediatble still it's accepting text cursor.		FIXED
c	- Edit employee > When we upload profile photo an error popup "Error handling photo upload" is displayed and later on profile photo gets uploaded successfully.	currently working on local need to test dev	
- Dashboard,Performance >	When we perform normal refresh, page takes too mcuh time to load.	currently working on local need to test dev	FIXED
- Performance >	Title "Project" is incorret.		FIXED
- Performance >	When we try to add Target and value nothing happens, performance info section remains unaffected.	this happend only when the employee created by the data base ,still need to check on dev	Working on dev need to check uat files
	- Sometimes after entering valid login credentials for employee too much time is taken for login.	aashish working on it	
	- After changing employee's password from admin side, when we login into employee's profile with new password, lot of time is taken to login.		FIXED
- Employee>	- Admin side > Edit employee popup > Attach if any field > We can choose video file.(Only doc format files should be allowed to choose) and edit time city and states not showing in form.		OPEN
- Employee Profile>	- Employee Profile > The spelling "Date of Birthy" is wrong, it should be "Date of Birth".		FIXED
Admin > Team member	- After adding team members from admin side the employee side takes lot of time to update.	swapnil working on it	
- Performance >	Performance Info > Spelling behavior should start with uppercase "Behavior".		FIXED
	UI Testing		
	- Mobile resolution > Dashboard > When we click on Notifications and search icon the dropdown and search bar are cut off.	deep working	
	- Mobile resolution > Dashboard > Edit project popup > The project status dropdown comes out.	Not a Bug (browser issue)	
	- Mobile resolution > Dashboard > Horizontal scrolling happens.	Not a Bug (Browser issue)	
	- Ipad resolution > Dashboard > We can scroll the Edit Project poupp horizontally and vertically also.	Not a Bug (Browser issue)	Tester not able to recreate.
	21 total bugs	8 Fixed	4 bugs not valid
		4 bugs of time delay	assigned to assish and swpanil
		3 working on dev need to check on uat	
		1 bug employee modal	assigned to divyang

Page/Module	BUGs found	Notes for dev	Dev Comments	QA Comments
Login page -	- After entering valid login credentials when login button is pressed too much time is taken and login happens when we refresh the page.			
	- After entering invalid login credentials when Login button is pressed multiple times then an error message "Invalid Email or password" is displayed multiple times.		If we are pressing login button multiple times, Then the message will show multiple times. (I am not sure if this is valid issue)	Tell me one thing after entering invalid login credentials I am pressing login button multiple times then error message should appear one time with fade in fade out effect right?? Because while error message is appearing still I am pressing Login button multiple times.
	- Enter valid login credentials > now before mailID enter multiple blank spaces > click on Login button > Error message "Invalid Email or password" is displayed > Now automatically blank spaces are removed from mailID and mailID shifts to left side > Now click on Login button > An Error message "Invalid Email or password" still displayed multiple times.		Need to recreate	
	- From Admin side if I kept blank spaces as user password then login happens successfully with blank spaces as password.			
Dashboard -	- Profile icon > The icon for Profile and setting both are same.			
	- The icon size for Total Project and Completed Project are wrong, don't match with UAT project and In-progress project icon size.			
Calendar -	- When we add an event from backend in calendar, then the event color #3C5ED4 hides the the event name on calendar.		This was not in the scope of Testing I believe. I had provided a document with all the module which needs to check.	
	- Can't delete the newly created event.			
	- Can add duplicate events with same name, start date, end date, and also same background color.			
Admin Projects -	- Edit Projects > We can enter maximum numerical values in project price input field (Maximum input limit should be set).			
	- Edit Projects > We can enter special characters and symbols in Reason for hold input field and still save the project. (An error popup should be displayed saying "Please enter valid reason for hold")			
	- In admin account go to Admin project > Edit project > Assign the project to other user > The project disappears (because project is assigned to other user) > Now refresh the Admin project page > The project assigned to other user appears.		Admin Can see all projects	
	- Edit Projects > Member assign section takes too much time to load.			
Milestone -	- Can enter milestone price with no limit (Should have input exceeding limit)			
Locker -	- In the table, the spelling for "Description" is wrong. (Correct is Description)			

Performance -	- Can add a target which is less than value(e.g. 15/10 Number of Release)		Yes, This is possible,as sometimes it may happen that the users has target of 4 releases and he completed themonth with 5	
	- Click on Add target,Add value button > Popup opens > close the popup > The tooltip appears automatically on Add target,Add value buttons.			
Employee -	- Employee list page takes too much time to load.			
	- After adding new employee an error popup "Error handling file upload" is dispalyed and "Employee added successfully" also displayed.			
Leave -	- Add Leave > Can't select employee, the dropdown list don't show employee names list.		This was not in the scope of Testing I believe. I had provided a document with all the module which needs to check.	
	- Asterisk icon is missing for Employee select field.			
	- Edit and delete buttons not working.			
Terms and conditions -	- Shows blank page.		This was not in the scope of Testing I believe. I had provided a document with all the module which needs to check.	
Admin Projects -	- In newly created user account the project page shown is different.

Page/Module	BUGs found	UI testing	Functionality	Spelling mistake/Name change
Locker		Edit Locker popup > The background color for tags in popup is different as compared to those Locker list tags column.	Go to locker > Edit Locker > Don't change anything > Press OK button > After "Locker edited successfully" message displayed the title list in the Locker list table automatically gets sorted.(Also occurs in Role and department)	Locker > After clicking on edit icon the popup title is wrong "Add new locker", it should be "Edit Locker".
Performance			Taking too much time to load.	
Employee(Admin)				Add employee > In date of join and date of birth input fields, the placeholder text written "Select end date" is wrong.
			Create new employee > Delete that employee > Now create new employee with same details > It throws error popup "Project already exists".(This issue also exists when we try to create an employee with different details)	
Common issues			Project start date,end date,milestone start date,end date, Add employee > Date of join & Date of birth Calendar popup > Select any date > Now check previous and future months > Same date is highlighted in previous and future months also.	
			Project start date,end date,milestone start date,end date, Add employee > Date of join & Date of birth Calendar popup > Today's date is missing highlight color.	
				Role > Edit role icon > The popup title is wrong, it should be "Edit Role".
				Department Edit icon > Popup > The popup title is wrong, it should be "Edit Department".
		Tooltip missing for Edit and delete icons in Dashboard, Projects,Milestone, Locker, Employee,role,department.		
Suggestions	Department > Replace Project types with Project type			
	Department > Replace Projects team with Project team			
	For all calendar popups > Provide the ability to select the year before 2000.			

Sr no	Main module	Page/Module	Bug type (Functional/UI/R esponsive)	Bug title	Description	Status	Comment	Link					
1	Admin Login	Employee	Functional		Employee delete time crash.	High		For all					
2		Add Employee			Employee ID >> Input value set alpha-numeric.			https://drive.google.com/drive/u/0/folders/1nMbwsLqRmTutVt4wgEj1yxO6YP1cZL_J					
3			Functional		After successfully adding / editing an employee, when searching for that employee, no data is displayed.								
4			Functional		After successfully adding an employee, the newly added employee is displayed, but the pagination entries remain unchanged.								
5			Functional		The newly added employee is displayed in the second position.								
6			Functional		Editing employee time does not display the attached file.								
7			Functional		After successfully editing an employee, the employee's position has changed.								
8			Functional		Date of Join >> future date selected.								
9			Functional		Click on user >> click on profile >> menu not closed.								
10			Functional		some time error message displayed. & error message also wrong.								
11			Functional	For all	add employee page open >> click outside >> page close.								
12			UI		required error message format not same for all filed								
13			UI		If the country/state/city is not mandatory, then remove the asterisk sign								
14			UI		Date picker size change >> set proper								
15			UI		City name not proper displayed.								
16			UI		Date color different displayed. for all places								
17			UI		Reporting To >> Drop down ui issue.								
18			UI		Project list section >> When the project name is lengthy, a scroll bar appears, causing the search bar and pagination buttons to be improperly positioned.								
19			UI		Project list section >> Please add some space between the pagination buttons and the scroll bar.								
1	Employee login	Dashboard	UI	Admin also	The positioning of the "In-Progress Project" and "Completed Project" elements is incorrect, and the icons are also inconsistent in size.								
2		Dashboard	UI	The same issue occurs in all locations.	Project list section >> When the project name is lengthy, a scroll bar appears, causing the search bar and pagination buttons to be improperly positioned.								
3		Dashboard	UI	The same issue occurs in all locations.	Project list section >> Please add some space between the pagination buttons and the scroll bar.								
4		Dashboard	UI		Project list section >> Projects Team >> last one cutoff.								
5		Dashboard	Functional	This issue for all pop-up	Project list section >> click on edit button >> edit page open >> click outside >> page close.								
6		Dashboard	Functional	The same issue occurs in all locations.	After edit project >> project list >> Project name not Sort alphabetically.								
7		Calendar	UI		When adding event , if you set the background color to blue and the text color also to blue, the calendar event name may not be displayed properly.								
8		Calendar	UI		When hovering over the "Today" button displays "This month," leading to the button's name changing to "This month."								
9		Calendar	Functional		Add event time enter event name / select start date & after selecting end date time click on date 2 times >> add event page close.								
10		Projects >> Projects	UI		Project Team >> If there are more than 5 members, then the icon for the 6th member is partially displayed.								
11		Project >> Milestone	Functional		If an employee has 3 projects, then during the milestone addition process, all projects are displayed in the dropdown list for project selection.								
12		Project >> Milestone	UI		When adding a milestone , add "+" or "-" sign in the milestone price field. clicking "Ok" button error message will prompt to fill in all required fields.								
13		Project >> Milestone	Functional		The milestones of only those projects which are assigned to the employee should be displayed.								
14		Project >> Milestone	Functional		Add milestone time >> after click on ok button >> message displayed "same name" --> Check Video	High							
15		Project >> Milestone	UI	This issue for all	When adding/edit a milestone and assigning it to a team, the dropdown menu does not open outside the page.								
16		Project >> Milestone	Functional		After deleting a milestone, clicking on the milestone name filter might still display the deleted milestone, possibly due to the page not refreshing.								
17		Locker	Functional		Added locker not displayed.	High							
18		Performance	Functional		All Employee list displayed.								
19		Performance	Functional		That employee can add targets and values for other employees as well.								
20		Performance	Functional		Clicking on "Add Target" without entering any data and directly clicking on the "Ok" button results in the message "Target added successfully" being displayed. (Same for add value time)
